Cast Iron Performance ...

...made in our foundry, our stoves and fires are cast with absolute precision for exceptional heating performance.

Beautifully Reliable

Each of our stoves and fires begins its life in our foundry. Firing at up to 1500°C, furnaces melt down the raw materials to make high quality cast iron for our products.

Moulded with absolute precision for strength and longevity, the cast iron used in Dovre products has excellent durability and thermal qualities. Radiating heat long after the fire has died, our cast iron stoves and fires retain their shape even after years of use.

Thanks to its versatile nature, cast iron can be crafted into a huge variety of shapes and textures, bringing beauty and presence to your interior whether traditional or contemporary.

Whatever your choice - wood, multi-fuel, gas or electric – your cast iron Dovre stove or fireplace will be built to the uncompromising standards you would expect from our Scandinavian heritage.

Clean, eco-friendly heating

Over the decades, Dovre products have been continuously developed to meet the toughest UK & European safety, efficiency, and emission standards. Today, all of our woodburning and multi-fuel stoves, as well as some of our fires, feature our cutting-edge Cleanburn and Airwash systems. This advanced combustion technology minimises environmental impact whilst delivering superb flame visuals with outstanding thermal efficiency.

High Efficiency

All solid-fuel models in this brochure burn wood or multi-fuel with outstanding efficiency, and are rated as either A or A+ energy class appliances according to European energy labelling standards. For more information on individual energy classes, see each appliance's product page.

Urban Area Approved

Our eco-focused approach to stove and fire design means that many models in this brochure are suitable for burning wood in urban areas. Independently tested, 250, Vintage and Sense models are all exempt from DEFRA smoke control restrictions in towns and cities*.

External Air Supply

Many stoves in this brochure can be installed with an external air supply meaning they do not need to draw any air from the room. This potentially negates the need for an additional air vent, therefore minimising drafts.

SIA Ecodesign Ready

All Dovre wood and multi-fuel stoves burn so cleanly, they meet proposed 2022 Ecodesign air quality standards. These low emission products produce minimal levels of carbon monoxide (CO), nitrogen oxide (NOx) organic gaseous compounds (OGCs) and particulates (PMs).

See our stoves being built

Watch our short film to see the typical journey of a Dovre stove, from the molten metal to the finished article:

dovre.co.uk/about-us

*250, Vintage & Sense stoves are approved when fitted with a Smoke Control Kit.

The dovre **difference...**

Wood and Multi-fuel Stoves and Fireplaces

Wood – Being carbon neutral, wood is the better fuel in environmental terms, as the amount of carbon dioxide released into the atmosphere is approximately the same as that absorbed by the tree during growth. It is also a renewable resource, particularly when derived from plantations and cultivated woodland. For optimum results, we recommend logs should be seasoned for 2 years or more to achieve a moisture content below 20%. This will not only give up to twice the output of freshly felled timber but help avoid a build up of tar in your flue. Hardwood logs are better still, as they will have around twice the calorific value of softwoods of equivalent weight.

Solid fuels – anthracite and manufactured smokeless fuels can be burnt on multi-fuel models which feature a fixed or riddling grate. Please note, however, that bituminous coal or petroleum based fuels must never be used on your stove.

Gas Stoves

All Dovre gas stoves are available with natural gas or LPG and depending on model, feature a highly realistic coal or log effect fire. These high efficiency stoves are available as manual operation but have the option to upgrade to either a standard remote, allowing heat regulation once the pilot light has been lit manually, or a programmable remote with additional thermostatic and timer controls.

Electric Stoves

A Dovre electric stove can be as easy to install as plugging in and switching on! All models feature our unique VeriFlame™ technology with low energy LED illumination and a hand painted fuel bed. The heater is discreetly located underneath and a remote control allows you to adjust the heat in addition to the VeriFlame effects which can run without any heat at all.

Expert Retailer Network & Warranty Information

Dovre products are only available from Expert Independent Retailers who will ensure your stove or fire is both appropriate for your home and fitted correctly. Your Dovre retailer will provide you with a Five Year Warranty for your new stove's castings and a Two Year Warranty on steel parts and gas and electric 'engines' used in stoves and fires. For more information, see page 72.

Accessories & Stove Care

Care of your Stove or Fireplace

To help you get the best performance from your stove or fireplace and keep it in good condition, inside and out, Stovax (Dovre's distributor in the UK and Republic of Ireland) offers a wide range of cleaning and maintenance products. Stovax also supplies a wide variety of fireplace accessories. Your Dovre retailer will be able to give you full details or you may view the complete range at www.stovax.com.

Fireplace, Stove and Hearth Accessories

Included in the brochure is an outstanding selection of fireplace and stove tools.

Expertly crafted with a variety of styling options and available in wrought iron, black, brass and chrome finishes, this exquisite range of accessories comprises individual tools alongside complete companion sets. There are also a number of classically designed pails, scuttles and holders for your coals, logs and kindling – functional and stylish accompaniments to your Dovre stove or fireplace.

Fire Screens and HearthGate

Stovax offers a wide range of fire screens that combine looks with practicality. Whether your Dovre appliance is traditional or contemporary in styling, you can find a fire screen that not only complements your stove or fire, but also helps keep you safe. Available in an array of designs and materials, including glass, black steel and brass plated, these fire screens are the perfect companion for your Dovre fire or stove.

Contemporary Fire Tools and Steel Log Holders

For more modern interiors, Stovax has developed a range of contemporary fire tools and log holders. That are both sturdy and attractive. These minimalist accessories offer a superb pairing to Dovre's range of contemporary stoves such as the Vintage, Sense and Astroline stoves. See pages 7, 20, 26, 39, 40, 43 and 45 for contemporary tools and log holders in situ.

Sense and Astroline Heat Shields

Dovre also offer a range of highly effective Heat Shields for the Astroline and Sense stoves. These fantastic additions reduce the distance to combustible materials at the rear and sides of the stoves as shown below.

The Dovre Heat Shields not only maximise the available space within the room, but they also enable you to accommodate a wider range of materials in your interior design. For further information please speak to your local Dovre retailer.

Distances to combustible materials when fitted with Dovre Heat Shield:

STOVE	DISTANCE FROM REAR	DISTANCE FROM SIDES
Astroline 3CB	100mm	300mm
Astroline 4CB	100mm	400mm
Sense 103 & 113	100mm	500mm
Sense 203	100mm	500mm

Traditional and Contemporary Mantels

Stovax also offer a wide range of mantelpieces which provide the perfect complement to many of the Dovre stoves and fires shown in this brochure. Choose from a wide selection of wood, cast iron or natural stone mantels in a choice of both historic and contemporary designs, each handcrafted to the highest quality finish. To view the extensive range on offer, please visit www.stovax.com to view and download the Stovax Classic Fireplaces brochure.

Further Information

Expert Retailer Network

We take great care to ensure that our stoves and fireplaces are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design; and ensure that you select the most appropriate product for your home. They will also be able to advise on or assist with the installation process as well as help provide any after-sales support and servicing of your appliance that you may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from nationwide online sales and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Further, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers

Warranty Information

Your Dove retailer will provide you with a Five Year Warranty for your new stove castings and a Two Year Warranty on steel parts and gas and electric 'engines' used in stoves and fires. The continuation of the warranty is dependant on your appliance being serviced by an appropriately qualified person 12 months after installation and annually thereafter. Please note, these warranties exclude certain consumable and naturally wearing parts such as grates, baffles, firebricks and glass. Full details are on our website at www.dovre.co.uk

Photography and Installation

Please note that, due to studio lighting and the limitations of the printing process, colour reproduction of enamel finishes may vary from actual product. Please consult your Dove retailer for more accurate colours.

All of the flame pictures shown in this brochure are taken from real fires. Please note however that flame pictures will vary depending on the exact fuel used, flue conditions and surrounding geographical features. Given that building regulations are subject to constant change, some of the photography in this brochure may not comply with the requirements of the latest Building Regulations and you should always check your proposed installation arrangement with your HETAS trained installer before proceeding. Certain settings in this brochure are dependant on the use of heat shields to reduce the required separation from combustible material. When designing your own installation, please observe the minimum distance to combustible materials as stated in the installation instructions.

The 'Nominal' heat output is to be used for calculating the ventilation provision as required by ADJ Building Regulations and for calculating its suitability for heating the size of room it will be fitted into. The heat output 'Range' is to be used as a guide only as the maximum and minimum performance will depend on local conditions such as flue pull, fuel quality and the way in which the product is used.

Please note: The operation and appearance of gas appliances depends on variable factors such as the gas pressure supplied.

Product Improvement and Safety Information

Dovre reserves the right to amend any specifications herein or to make any product design changes.

Please note that all parts of these stoves and fires, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm. Furthermore, by law all installations also require a Carbon Monoxide Monitor be supplied and fitted.

Enamelled Flue Pipe

For the fully colour coordinated installation of your stove, and optimum performance, we offer high quality enamel coloured flue pipe. However, please note that due to the different production processes we cannot guarantee a perfect match between pipe and stove. The flue pipe diameters required for each model are demonstrated on the product pages.
