Innovative technology,
brilliant performance

⊃⊂ **Dimplex**®

In 2019 we're bringing you a host of patented technology that cranks up the style stakes and leaves you and your customers happy.

We're launching 10 new fires that deliver the heartbeat of our mission – creating stunning new products and driving innovation.

The feature piece of our new range is Optiflame 3D. Unique to Dimplex, this effect takes our original Optiflame technology and brings it straight into the 21st Century. For the first time, a 2D effect is given 3D depth and detail, alongside a host of other features.

However, Optiflame 3D is not our only launch. We have a new medium sized stove – the Lucia, a new Optiflame inset fire – the Ellister, a new Firebox for fitting into surrounds and a roll out of more options in the Ignite range.

As with all of our fires, there are plenty of different styles and finishes to choose from. Giving you unrivalled options and brilliant performance, your customers will be spoilt for choice when it comes to selecting a fire from Dimplex.

We've revamped Optiflame to bring you a richer flame effect, customisable fuel beds that reflect your customer's room and help craft their ideal internal atmosphere.

Optiflame 3D gives the power of choice. Add a blue flame for cool, calm vibes or choose a deep orange for a glorious glow. Adjust the downlighting to enhance the drama and pick the perfect crystals, logs, coal or pebbles to enrich the luminosity of the fuel bed*.

Remote control technology allows the room temperature and timer to be set with ease and reduce energy wastage. The thermostatic control gets the room calm and cosy, setting it to just the right temperature and optimising your comfort and energy use.

Using optimised thermostat control, digital operating technology and eye-catching designs your customers get cosy comfort, touch-of-a-button control and fires that continue to make a statement.

We know that creating the finest electric fires is as much about the flame as it is the feel. The Optiflame 3D will leave your customers with toasty toes, while its warm glow makes rooms alluring and restful.
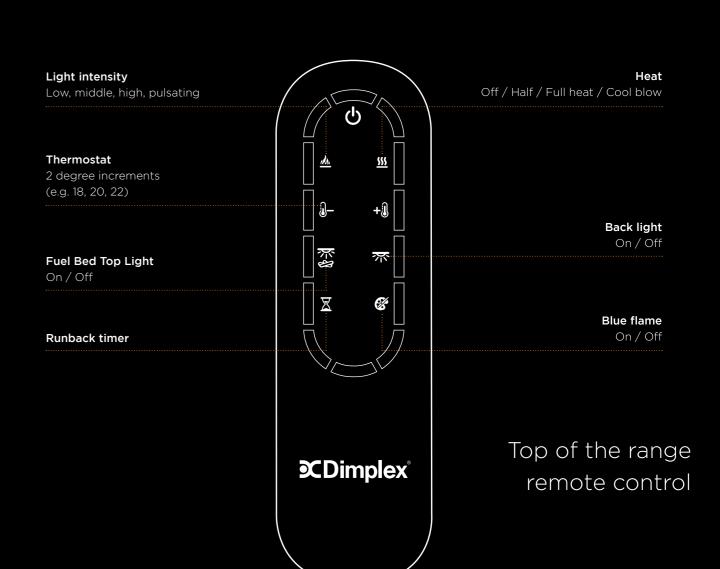

*Pebbles available on selected models only

The new Optiflame 3D range has a host of exciting features

Optiflame³ᴰ
